# IMPORTANT INFORMATION

This presentation and the information and views included herein do not constitute investment advice, or a recommendation or an offer to enter into any transaction with Eagle Point Income Company Inc. ("EIC" or the "Company") or any of its affiliates. This presentation is provided for informational purposes only, does not constitute an offer to sell securities of the Company or a solicitation of an offer to purchase any such securities, is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted, and is not a prospectus. From time to time, the Company may have a registration statement relating to one or more of its securities on file with the Securities and Exchange Commission ("SEC"). Any registration statement that has not yet been declared effective by the SEC, and any prospectus relating thereto, is not complete and may be changed. Any securities that are the subject of such a registration statement may not be sold until the registration statement filed with the SEC is effective.

This presentation is solely for the use of the intended recipient(s). The information and its contents are the property of Eagle Point Income Management LLC (the "Adviser") and/or the Company. Any unauthorized dissemination, copying or use of this presentation is strictly prohibited and may be in violation of law. This presentation is being provided for informational purposes only.

**Investors should read the Company's prospectus and SEC filings (which are publicly available on the EDGAR Database on the SEC website at <http://www.sec.gov>) carefully and consider their investment goals, time horizons and risk tolerance before investing in the Company. Investors should consider the Company's investment objectives, risks, charges and expenses carefully before investing in securities of the Company as described in the prospectus.** There is no guarantee that any of the goals, targets or objectives described in this presentation will be achieved. An investment in the Company is not appropriate for all investors and is not intended to be a complete investment program. Shares of closed-end investment companies, such as the Company, frequently trade at a discount from their net asset value, which may increase investors' risk of loss. **Past performance is not indicative of, or a guarantee of, future performance.** The performance and certain other portfolio information quoted herein represents information as of dates noted herein. Nothing herein shall be relied upon as a representation as to the future performance or portfolio holdings of the Company. Investment return and principal value of an investment will fluctuate, and shares, when sold, may be worth more or less than their original cost. The Company's performance is subject to change since the end of the period noted in this report and may be lower or higher than the performance data shown herein.

Neither the Adviser nor the Company provides legal, accounting or tax advice. Any statement regarding such matters is explanatory and may not be relied upon as definitive advice. Investors should consult with their legal, accounting and tax advisers regarding any potential investment. The information presented herein is as of the dates noted and is derived from financial and other information of the Company, and, in certain cases, from third party sources and reports (including reports of third party custodians, CLO collateral managers and trustees) that have not been independently verified by the Company. As noted herein, certain of this information is estimated and unaudited, and therefore subject to change. The Company does not represent that such information is accurate or complete, and it should not be relied upon as such. This report does not purport to be complete and no obligation to update or revise any information herein is being assumed.

3. Combined market capitalization of EIC and EICA based on securities outstanding as of June 30, 2023 and market prices as of July 31, 2023.

4. Based on EIC's closing market price of \$13.39 per share on July 31, 2023 and amount and frequency of regular distributions most recently declared by the Company. Cumulative common distribution amount is as of June 30, 2023. To date, a portion of common stock distributions has been estimated to be a return of capital as noted under the Tax Information section on the Company's website. The actual components of the Company's distributions for U.S. tax reporting purposes can only be finally determined as of the end of each fiscal year of the Company and are thereafter reported on Form 1099-DIV. A distribution comprised in whole or in part by a return of capital does not necessarily reflect the Company's investment performance and should not be confused with "yield" or "income". Future distributions may consist of a return of capital. **Not a guarantee of future distributions or yield.**

5. As of June 30, 2023 and also reflects amounts managed by Eagle Point Credit Management LLC, an affiliate of the Adviser, inclusive of capital commitments that were undrawn as of such date.

# INTRODUCTION TO EIC

## EIC Highlights

### CLO Junior Debt is an Attractive Asset Class

- BB-rated CLO debt has had a relatively **low historical default rate** of 4 bps per annum<sup>1</sup>
- Eagle Point believes BB-rated CLO debt offers the potential for higher returns as compared to senior secured loans and high yield bonds
- All of the Company's BB-rated CLO securities are floating rate and could benefit from increases in interest rates
- The Credit Suisse Leveraged Loan Index has generated positive total returns in 28 of the past 31 full calendar years<sup>2</sup>

### Specialized Investment Team

- Eagle Point is focused on CLO securities and related investments (as well as other income-oriented investments)
- Each member of Eagle Point's Senior Investment Team is a CLO industry specialist who has been directly involved in the CLO market for the majority of his career

### Differentiated Investment Strategy and Process

- With an emphasis on assessing the skill of CLO collateral managers and analyzing CLO structures, Eagle Point believes that its approach is more akin to a *private equity style* investment approach than to the typical process used by many fixed income investors

1. Standard & Poor's, Default, Transition, and Recovery: 2021 Annual Global Leveraged Loan CLO Default Study And Rating Transitions. See page 7.

2. The CSLLI tracks the investable universe of the US dollar-denominated leveraged loan market. The performance of an index is not an exact representation of any particular investment, as you cannot invest directly in an index. Similarly, since 2001, from a total return perspective, the Morningstar LSTA US Leveraged Loan Index experienced only three down full calendar years (2008, 2015 and 2022 with returns of -29.1%, -0.7% and -0.6%, respectively). The Morningstar LSTA US Leveraged Loan Index is a market value-weighted index designed to measure the performance of the U.S. leveraged loan market based upon weightings, spreads and interest payments. See page 13.

Past performance is not indicative of, or a guarantee of, future performance. Please see Important Information on page 1.

## Why Invest in BB-Rated CLO Debt?

### Key Attributes

- Potential for lower credit expense
- Potential for higher returns
- Expected protection against rising interest rates<sup>1</sup>

### Potential For Lower Credit Expense

*From 1996 - 4Q 2021, the cumulative default rate on BB-rated CLO debt was 1.1% (or ~ 4 bps per annum)<sup>2</sup>*

### CLO BB versus BB HY Yield<sup>3</sup>

**Past performance is not indicative of, or a guarantee of, future performance.** No representation is being made as to the applicability of historical statistics to future periods. The information shown herein is for background purposes only. Please see Important Information on page 1.

1. Similar to the senior secured loans that serve as the underlying collateral for CLOs, BB-rated CLO debt is a floating rate security that pays interest based on a 3-month interest rate (such as LIBOR or SOFR), plus a spread and, as a result, is expected to have lower interest rate risk than other fixed income securities in a rising interest rate environment. However, the Company's CLO investments are still subject to other forms of interest rate risk, including increased risk of default by CLO's underlying obligors.
2. Standard & Poor's, Default, Transition, and Recovery: 2021 Annual Global Leveraged Loan CLO Default Study And Rating Transitions; Adviser's analysis of market data over applicable periods. The default rate on BB-rated CLO debt is 1% as compared to 3% per annum for senior secured loans and 4% per annum for high-yield bonds for the same time period.

# CLO MARKET OVERVIEW

## Senior Secured Loans are the Raw Materials of CLOs

### Senior Secured Loans Represent “Pure” Credit Exposure

<b>Senior</b>	Senior position in a company’s capital structure
<b>Secured</b>	First lien security interest in a company’s assets
<b>Floating Rate</b>	Mitigates interest rate risk associated with fixed rate bonds <sup>1</sup>
<b>Low LTV</b>	Senior secured loans often have a loan-to-value ratio of approximately 40-60% <sup>2</sup>
<b>Consistent Returns</b>	Since 1992, the Credit Suisse Leveraged Loan Index experienced only three years of negative total returns

- BB-rated CLO debt is a floating rate security that pays interest based on a 3-month interest rate (such as LIBOR or SOFR) plus a spread and, as a result, is expected to have lower interest rate risk than high yield bonds, which are fixed income securities, in a rising interest rate environment. However, the Company’s CLO investments are still subject to other forms of interest rate risk, including increased risk of default by CLO’s underlying obligors.
- Loan-to-value ratio is typically based on market values as determined in an acquisition, by the public in the case of publicly traded companies, or by private market multiples and other valuation methodologies in the case of private companies.
- The illustrative borrowers shown may not reflect a meaningful part of the portfolios of our CLO investments and have been selected to provide context regarding the general types of borrowers of U.S. senior secured loans. Most of such borrowers are not as recognizable to the public as those shown.
- Source: Moody’s Investor Services Default Trends – Global (January 2023). Senior Loans include first lien, second lien and unsecured term loans. No representation is being made as to the applicability of historical relative recovery rates to future periods. The information shown herein is for background purposes only and is the most recent data available.

# CLO MARKET OVERVIEW

## Loan Market Repayment Rate

*Loan repayments provide capital for reinvestment within CLOs*

### Annual Repayment Rate

# CLO MARKET OVERVIEW

## CLOs are Securitizations of a Portfolio of Senior Secured Loans

*The Company focuses primarily in junior debt tranches of CLOs, with a focus on BB-rated CLO debt*

### Key Characteristics of CLO Structure

- No mark-to-market triggers (i.e., no margin calls or forced sales)
- Match funded (i.e., limited refinancing risk on CLO debt)<sup>1</sup>
- Ability to reinvest loan principal (i.e., actively managed)

The CLO structure highlighted on this page is a hypothetical structure, and the structure of CLOs in which the Company invests may vary from the example.

1. Since a CLO's indenture typically requires that the maturity dates of a CLO's assets (typically 5 to 7 years from the date of issuance of a senior secured loan) be shorter than the maturity date of the CLO's liabilities (typically 12 to 13 years), CLOs generally do not face refinancing risk on the CLO debt. However, CLO investors do face reinvestment risk with respect to a CLO's underlying portfolio. In addition, in most CLO transactions, CLO debt investors are subject to prepayment risk in that the holders of a majority of the equity tranche can direct a call or refinancing of a CLO, which would cause the CLO's outstanding CLO debt securities to be repaid at par.

# CLO MARKET OVERVIEW

## Key Forms of Credit Enhancement for CLO Debt Investors

### CLO debt benefits from structural features and covenants that enhance its credit protection

#### ■ Overcollateralization

- At a CLO's inception, the principal value of the loan collateral exceeds the principal amount of the CLO debt outstanding (i.e., the CLO debt is "overcollateralized" by excess loan collateral)

#### ■ Excess Spread

- Since the spread on a CLO's loan collateral exceeds the spread on the CLO debt, this excess spread serves as a source of credit enhancement for CLO debt investors

#### ■ Non-Static Structure

- The structure of CLOs enables the CLO collateral manager to take advantage of periods of market stress and loan price volatility by re-investing principal proceeds from loan repayments and sales into loans potentially at lower prices and wider spreads

**In Eagle Point's opinion, these “self-correcting” structural features of CLOs offer a margin of safety for CLO debt investors and have contributed to the low historical default rate on CLO debt<sup>1</sup>**

1. Reflects the Adviser's current opinion only and is subject to change without notice. Investments in CLO securities are subject to risk, including the full loss of principal.

1. WA (Weighted Average). Weighted average coupon of CLO debt and weighted average mark of CLO debt are based on relative par amounts as of June 30, 2023. CLO positions are entitled to recurring distributions which for CLO equities are generally equal to the remaining cash flow of payments made by underlying assets less contractual payments to debt holders and CLO expenses. The effective yield is estimated based upon the current projection of the amount and timing of these recurring distributions in addition to the estimated amount of terminal principal payment. The weighted average effective yield is calculated based on the current amortized cost of investments. This statistic is being provided for informational purposes only and does not necessarily reflect the yield at which the Company's records its investment income for each investment. The estimated yield and investment cost may ultimately not be realized.
2. Represents the estimated fair value of investments as of June 30, 2023. Cash and borrowing capacity represents cash net of pending trade settlements and includes available capacity on the Company's credit facility as of June 30, 2023; a value of "N/A" indicates a negative balance due to the timing of trading activities. Borrowings under the credit facility are subject to applicable regulatory and contractual limits.
3. The information presented herein is on a look-through basis to the collateralized loan obligation, or "CLO" and other related investments held by the Company as of June 30, 2023 (except as otherwise noted) and reflects the aggregate underlying exposure of the Company based on the portfolios of those investments. The data is estimated and unaudited and is derived from CLO trustee reports received by the Company relating to June 2023 and from custody statements and/or other information received from CLO collateral managers and other third party sources. Information relating to the market price of underlying collateral is as of month end; however, with respect to other information shown, depending on when such information was received, the data may reflect a lag in the information reported. As such, while this information was obtained from third party data sources, June 2023 trustee reports and similar reports, other than market price, it does not reflect actual underlying portfolio characteristics as of June 30, 2023 and this data may not be representative of current or future holdings. The weighted average remaining reinvestment period information is based on the fair value of CLO equity and debt investments held by the Company at the end of the reporting period.
4. Data represents aggregate indirect exposure. We obtain our exposure in underlying senior secured loans indirectly through our CLO and related investments.
5. The weighted average OC cushion senior to the security is calculated using the BBB OC cushion for all BB-rated CLO debt securities in the portfolio and the BB OC cushion for all other securities in the portfolio, in each case as held on June 30, 2023.
6. Credit ratings shown are based on those assigned by Standard & Poor's Rating Group, or "S&P," or, for comparison and informational purposes, if S&P does not assign a rating to a particular obligor, the weighted average rating shown reflects the S&P equivalent rating of a rating agency that rated the obligor provided that such other rating is available with respect to a CLO or related investment held by us. In the event multiple ratings are available, the lowest S&P rating, or if there is no S&P rating, the lowest equivalent rating, is used. The ratings of specific borrowings by an obligor may differ from the rating assigned to the obligor and may differ among rating agencies. For certain obligors, no rating is available in the reports received by the Company. Ratings below BBB- are below investment grade. Further information regarding S&P's rating methodology and definitions may be found on its website ([www.standardandpoors.com](http://www.standardandpoors.com)).
