Network **MOST IMPROVED** of any national carrier in fiscal 2017^[2]

Average Download Speeds

Up **36%** year-over-year

[2] Ookla's analysis of Speedtest Intelligence data comparing March 2017 to March 2018 for all mobile results

Message from the CEO

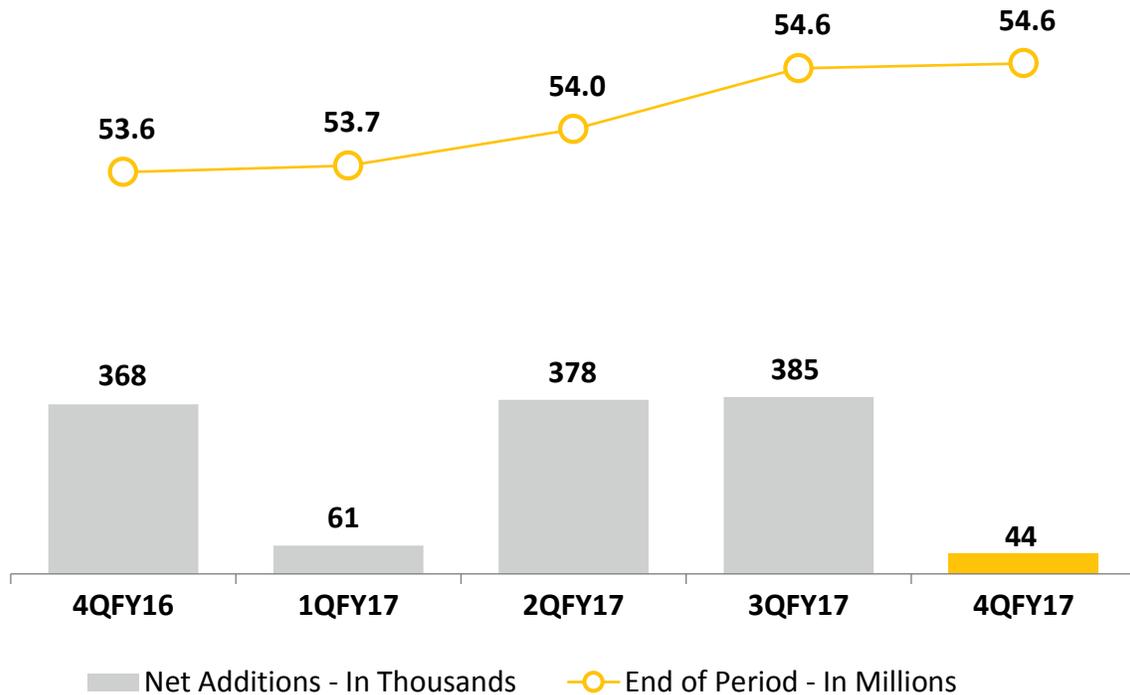

In the fourth year of our turnaround, Sprint delivered the best financial results in company history as a result of growing our customer base and continuously improving our cost structure, while significantly improving our LTE network and initiating deployment for the first truly mobile 5G network in the U.S. By executing our turnaround, we have positioned Sprint for strategic opportunities which led to our proposed merger with T-Mobile, which will create an entirely new level of innovation and disruption in the industry.

Marcelo Claure

Total Connections

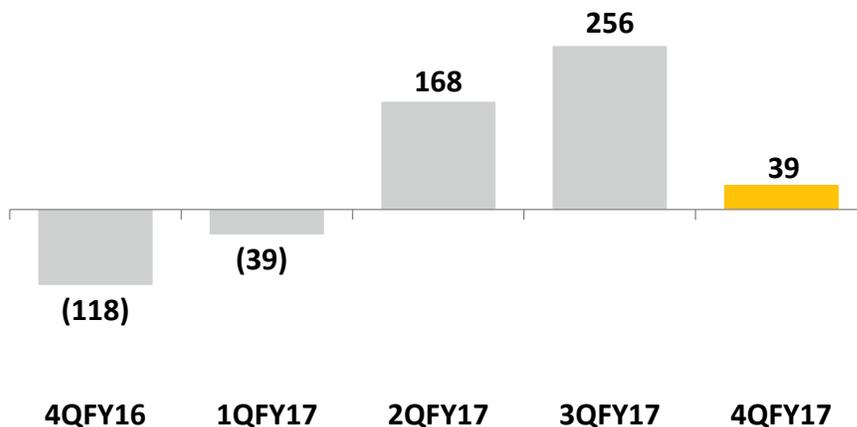

The company had **44,000 net additions** in the current quarter compared with 368,000 in the year-ago period and 385,000 in the prior quarter.

Sprint ended the quarter with over **54.6 million connections**, including 32.1 million postpaid, 9.0 million prepaid, and 13.5 million wholesale and affiliate connections.

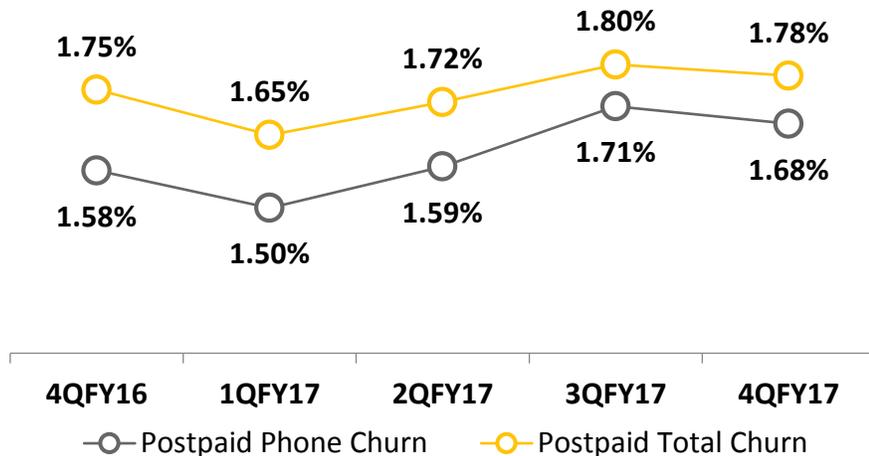

Postpaid net additions were 39,000 during the quarter compared to net losses of 118,000 in the year-ago period and net additions of 256,000 in the prior quarter. The year-over-year increase was primarily driven by higher other device net additions and fewer tablet net losses, while the sequential decrease was primarily driven by lower phone net additions and an increase in tablet net losses. The current quarter included 44,000 net migrations from prepaid to non-Sprint branded postpaid.

Postpaid Net Additions (Losses)

In Thousands

Postpaid Total Churn and Postpaid Phone Churn

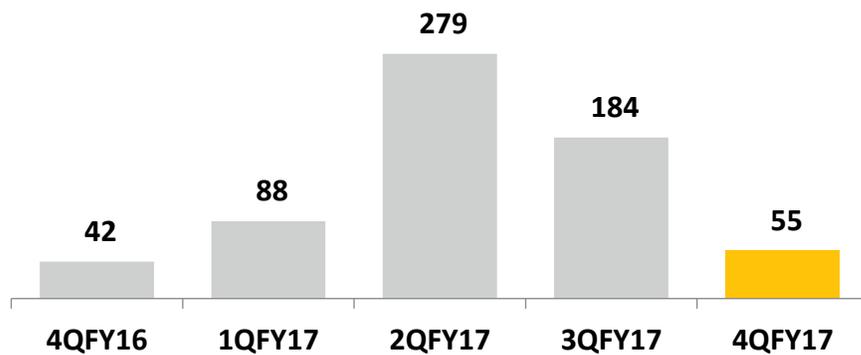

Postpaid phone churn of 1.68 percent compared to 1.58 percent in the year-ago period and 1.71 percent in the prior quarter. The year-over-increase was driven by the company’s decision to selectively manage both higher ARPU customers and customers rolling off device commitments in order to maximize the net present value of the base. The sequential decrease was impacted by typical seasonality.

Postpaid total churn of 1.78 percent for the quarter compared to 1.75 percent in the year-ago period and 1.80 percent in the prior quarter. The year-over-year increase and sequential decrease were mostly impacted by changes in postpaid phone churn.

Postpaid phone net additions of 55,000 compared to net additions of 42,000 in the year-ago period and 184,000 in the prior quarter. Year-over-year, higher gross additions were partially offset by higher churn, while the sequential decrease was primarily driven by seasonally lower gross additions. The current quarter included 44,000 net migrations from prepaid to non-Sprint branded postpaid.

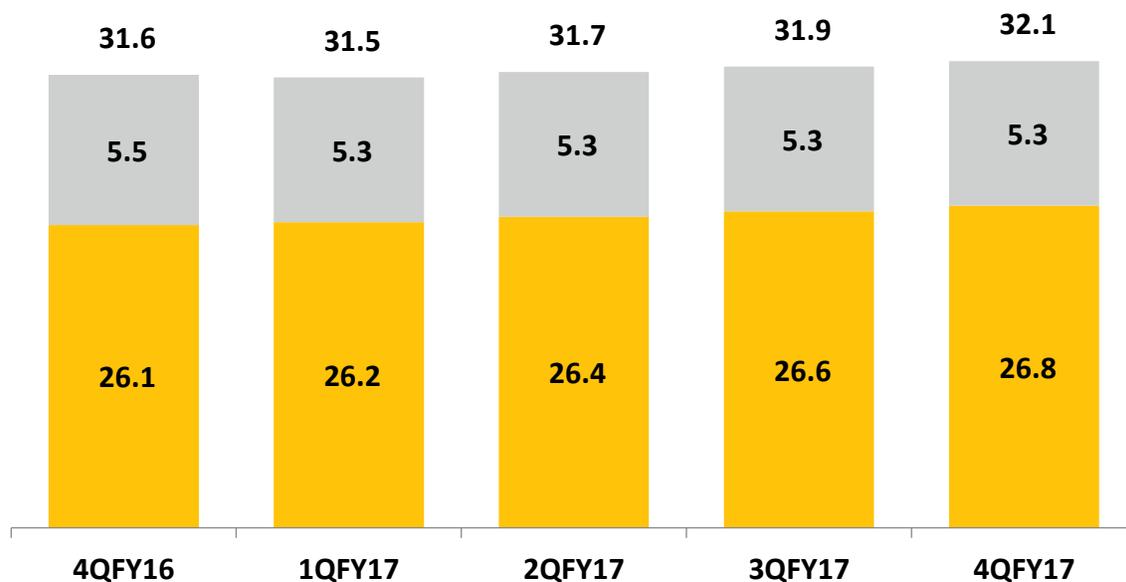

Postpaid Phone Net Additions
In Thousands

Tablet and other device net losses of 16,000 in the quarter compared to net losses of 160,000 in the year-ago period and net additions of 72,000 in the prior quarter. The year-over-year increase was driven by sales of wearables, combined with lower tablet net losses. Sequentially, the decrease was driven by an increase in tablet net losses. The current quarter included 130,000 tablet net losses, compared to 170,000 in the year-ago period and 69,000 in the prior quarter.

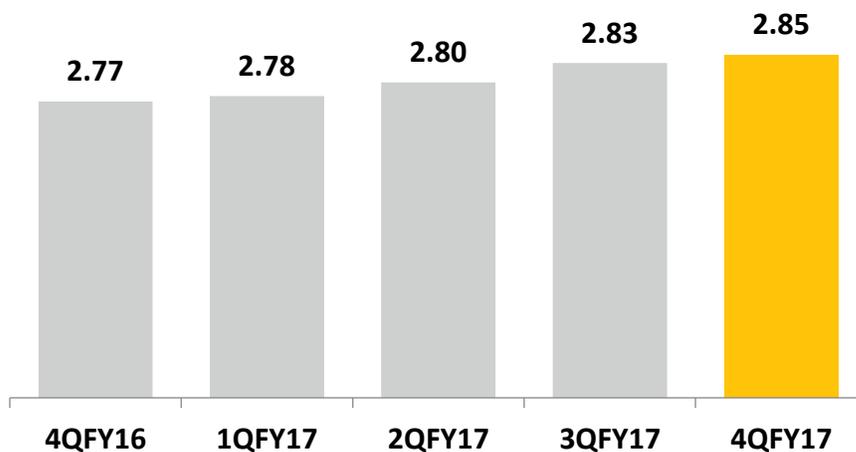

Postpaid Connections
In Millions

■ Phones ■ Tablets and Other Devices

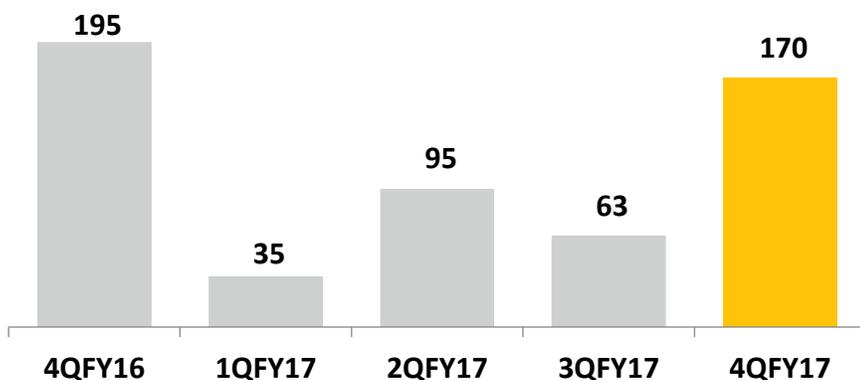

Average postpaid connections per account of 2.85 at quarter end compared to 2.77 in the year-ago period and 2.83 in the prior quarter. The growth has been driven by higher phones per account, partially offset by tablet losses.

Average Postpaid Connections per Account

Prepaid Net Additions

In Thousands

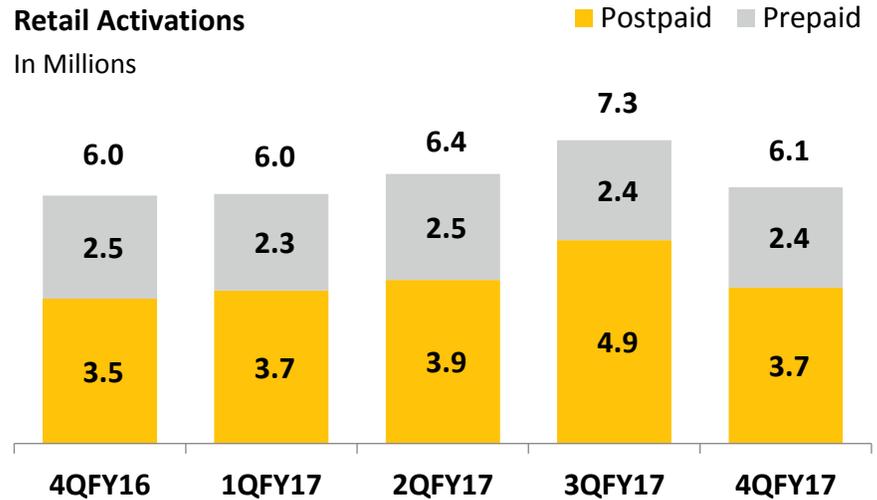

Wholesale & affiliate net losses were 165,000 in the quarter compared to net additions of 291,000 in the year-ago period and net additions of 66,000 in the prior quarter. The year-over-year and sequential declines were primarily driven by lower connected device net additions, which generally have a lower ARPU than other wholesale & affiliate customers.

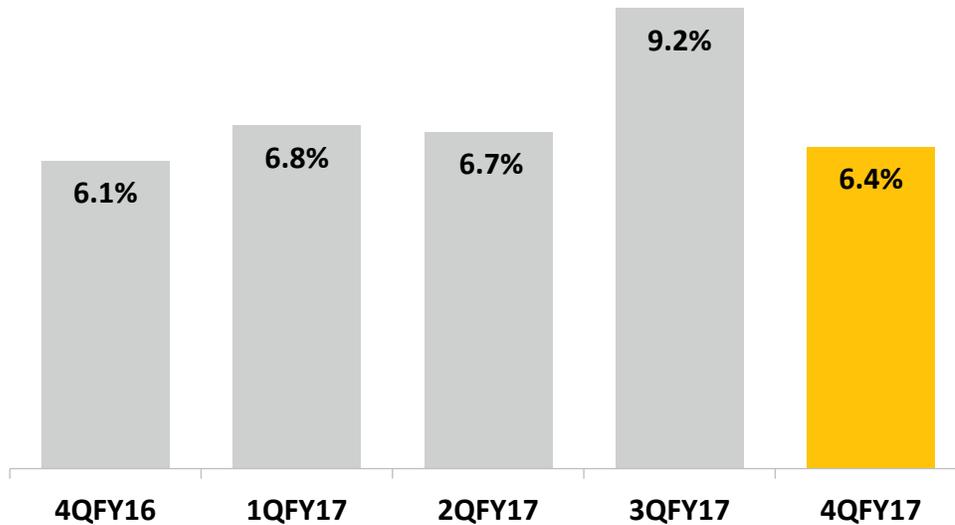

Prepaid net additions of 170,000 during the quarter compared to 195,000 in the year-ago period and 63,000 in the prior quarter. The year-over-year decrease was due to 44,000 net migrations from prepaid to non-Sprint branded postpaid. Sequentially, the improvement was mostly driven by higher gross additions and lower churn in the Boost brand.

Prepaid churn was 4.30 percent compared to 4.69 percent for the year-ago period and 4.63 percent for the prior quarter. The year-over-year and sequential improvement was mostly due to lower churn in the Boost brand.

Retail activations were 6.1 million during the quarter compared to 6.0 million in the year-ago period and 7.3 million in the prior quarter. Year-over-year, the increase was driven by higher postpaid gross additions and phone upgrades, partially offset by lower prepaid upgrades. Sequentially, the decrease was primarily driven by seasonally lower postpaid gross additions and postpaid phone upgrades.

Postpaid Upgrades as a Percent of Total Postpaid Subscribers

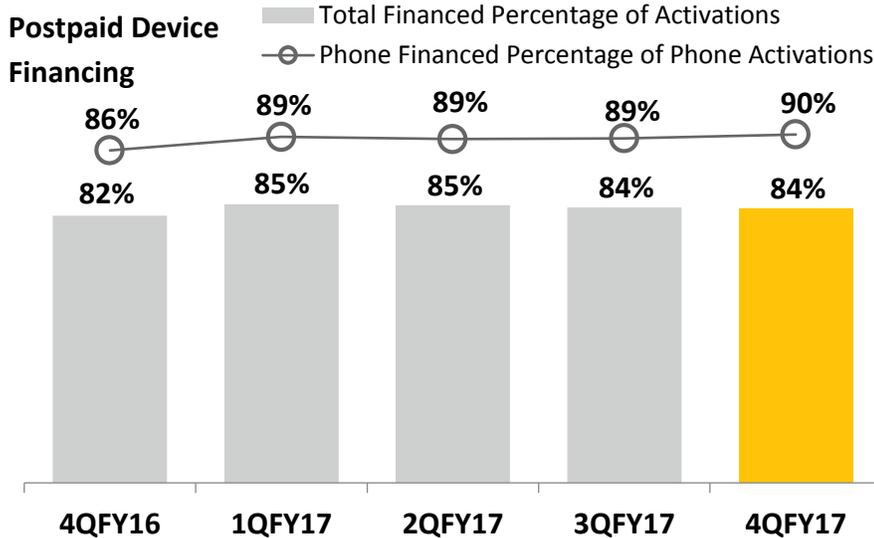

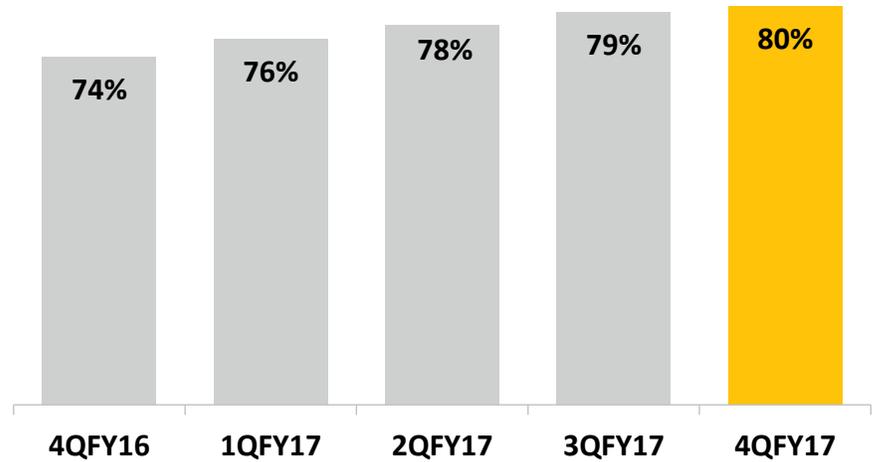

Postpaid upgrade rate was 6.4 percent during the quarter compared to 6.1 percent for the year-ago period and 9.2 percent for the prior quarter. The sequential decrease was due to seasonality.

Postpaid phone connections on unsubsidized service plans

represented 80 percent of the base at the end of the quarter, compared to 74 percent in the year-ago period and 79 percent in the prior quarter.

Postpaid Phone Connections on Unsubsidized Service Plans

Postpaid carrier aggregation capable phones, which allow for higher download data speeds, were 93 percent of postpaid phones activated during the quarter, increasing the number of these phones within the phone base to 76 percent.

Postpaid device financing rate was 84 percent of postpaid activations for the quarter compared to 82 percent for the year-ago period and 84 percent in the prior quarter. At the end of the quarter, 47 percent of the postpaid connection base was active on a leasing agreement compared to 38 percent in the year-ago quarter and 45 percent in the prior quarter.

Postpaid phone financing rate was 90 percent of phone activations for the quarter compared to 86 percent for the year-ago period and 89 percent in the prior quarter.

Sprint is building a super-reliable, high-capacity mobile network that will deliver a great LTE experience and enable industry-leading 5G capabilities. The company's Next-Gen Network plan involves:

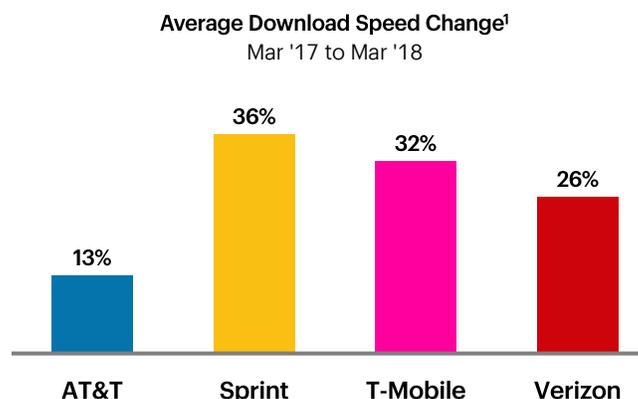

- Upgrading existing towers to leverage all three of the company's spectrum bands
- Building new macro cell sites
- Adding more small cells including mini-macros, strand mounts with cable operators and Sprint Magic Boxes
- Deploying 5G technologies such as Massive MIMO

With more than 160 MHz of 2.5 GHz spectrum in the top 100 markets, Sprint is one of the only operators in the world with enough capacity to operate LTE and 5G simultaneously using Massive MIMO and huge channels of 100-200 MHz of licensed spectrum on the same radios. Sprint expects to launch the first mobile 5G network in the U.S. in the first half of 2019.

Sprint completed thousands of tri-band upgrades on macro sites, added thousands of outdoor small cells and deployed more than 200,000 Sprint Magic Boxes in fiscal year 2017. These deployments helped drive continued improvement in network quality, as seen in Ookla's Speedtest Intelligence data.

- Sprint saw a 36 percent year-over-year increase in its national average download speed, the largest increase of the top four national carriers.¹
- Sprint is #1 for fastest average download speed in 100 cities, more than twice as many cities as last year and more than AT&T for the third consecutive quarter.²

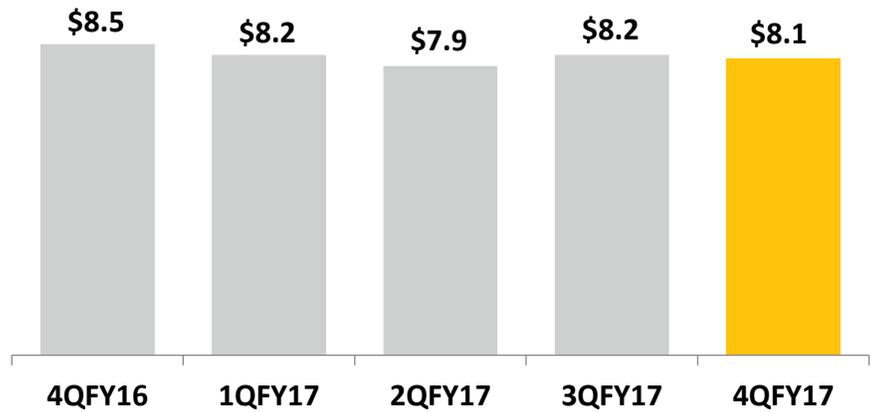

¹ Based on Ookla's analysis of Speedtest Intelligence data comparing March 2017 to March 2018 for all mobile results.

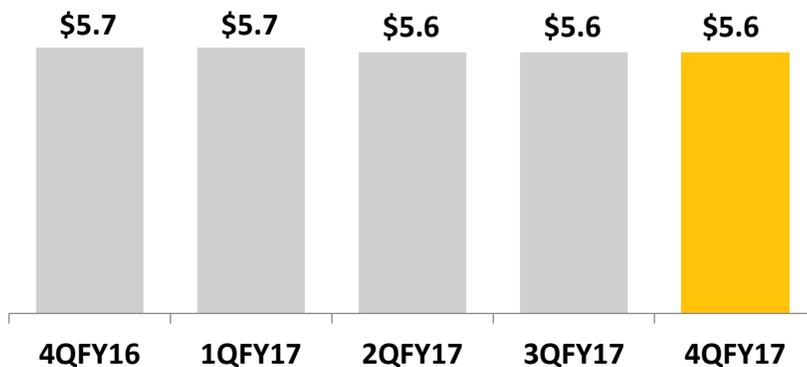

² Based on Ookla's analysis of Speedtest Intelligence data from 1/1/18 to 3/31/18 for all mobile results when comparing cities where the top four national carriers rank.

Net operating revenues of \$8.1 billion for the quarter declined \$456 million year-over-year and \$156 million sequentially. Both the year-over-year and sequential declines were driven by lower equipment sales and service revenue, partially offset by higher equipment rentals.

Net Operating Revenues
Dollars In Billions

Wireless Service Revenue
Dollars In Billions

Wireless service revenue of \$5.6 billion declined \$171 million year-over-year and \$46 million sequentially. The year-over-year reduction was impacted by lower postpaid phone ARPU, partially offset by growth in the postpaid phone customer base. Sequentially, wireless service revenue was relatively flat.

Prepaid Service Revenue

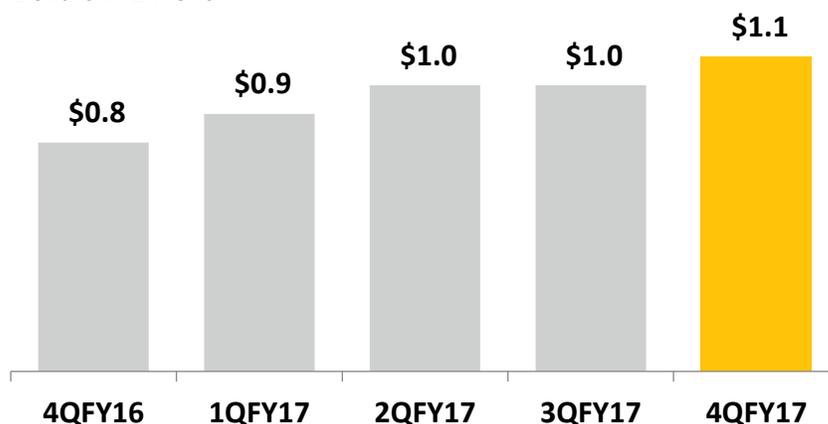

INCREASED
Year-over-Year
For the second consecutive quarter

Wireline revenues of \$344 million for the quarter declined \$136 million year-over-year and \$49 million sequentially. The year-over-year and sequential declines were primarily driven by lower voice volumes, as the company continues to de-emphasize voice services. The year-over-year decline was also impacted by the annual process of resetting the intercompany rate, based on current market prices for voice and IP services sold to the wireless segment.

Equipment sales of \$1.1 billion decreased \$500 million year-over-year and \$181 million sequentially. The year-over-year decrease was mostly driven by a lower mix of installment billing sales. Sequentially, the decrease was mostly driven by seasonally lower postpaid sales volumes. Sales of used devices to third parties, which have a corresponding impact to cost of products expense and are relatively neutral to Adjusted EBITDA*, were in line with recent quarters.

Equipment Rentals

Dollars In Billions

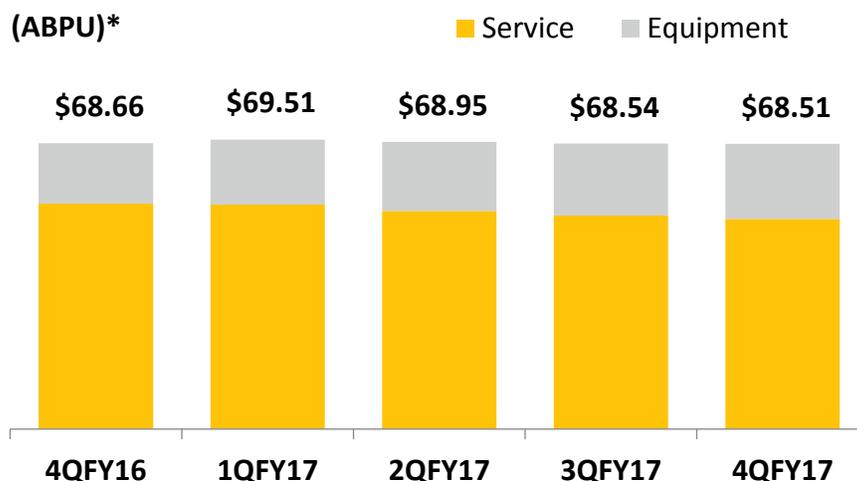

Equipment rentals, formerly referred to as lease revenue, of \$1.1 billion increased \$294 million year-over-year and \$89 million sequentially. Both the year-over-year and sequential growth were driven by the growing number of leasing customers.

Postpaid Phone Average Billings

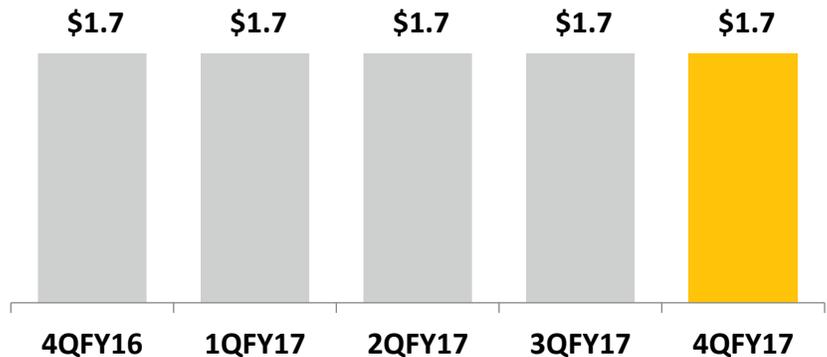

Per User (ABPU)* of \$68.51 for the quarter was relatively flat both year-over-year and sequentially. Year-over-year, higher equipment rentals associated with device financing offset a shift to lower priced rate plans.

Postpaid Phone Average Billings Per User (ABPU)*

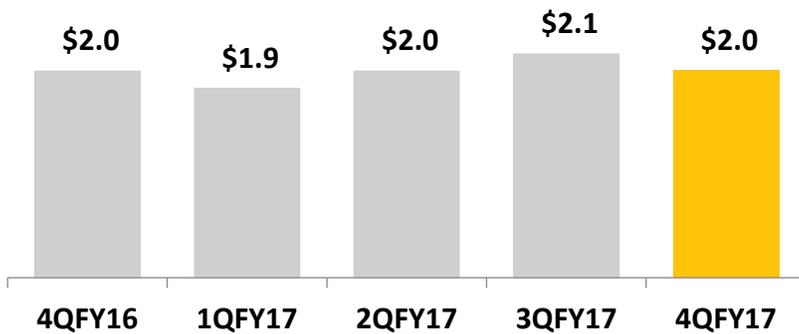

Cost of services (CoS) of \$1.7 billion for the quarter decreased \$75 million year-over-year and \$72 million sequentially. Year-over-year, the decrease was driven by lower wireline and network expenses. Sequentially, cost of services were relatively flat after adjusting for non-recurring charges of \$3 million related to hurricane expenses in the current quarter, as well as \$51 million related to a regulatory fee matter and \$30 million related to hurricane expenses in the prior quarter.

Cost of Services
Dollars In Billions

Selling, General, and Administrative
Dollars In Billions

Selling, general and administrative expenses (SG&A) of \$2.0 billion for the quarter increased by \$26 million year-over-year and decreased \$80 million sequentially. Year-over-year, a decrease in bad debt expense was offset by increases in postpaid marketing and sales expenses. Sequentially, the decrease was driven by lower bad debt expense and seasonally lower sales expense.

Cost of equipment rentals, formerly referred to as loss on leased devices, of \$146 million for the quarter increased \$5 million year-over-year and \$23 million sequentially.

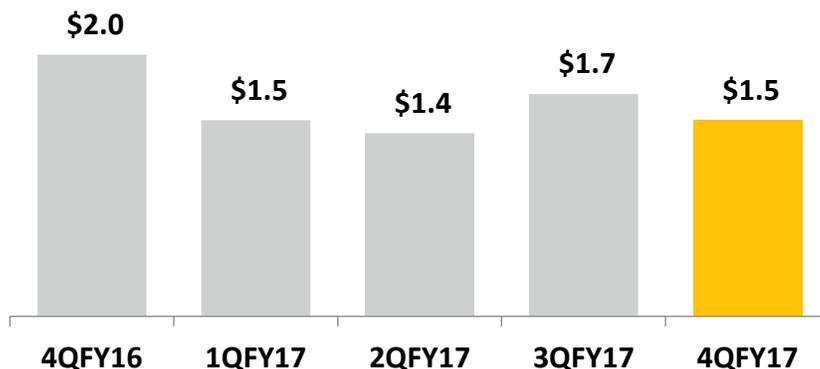

NEARLY \$6B REDUCTION in the last four years in CoS and SG&A^[1]

[1] after adjusting for hurricane and other non-recurring charges

Cost of equipment sales of \$1.5 billion for the quarter decreased \$493 million year-over-year and \$186 million sequentially. The year-over-year decrease was primarily impacted by a lower mix of installment billing sales. The sequential decrease was primarily driven by seasonally lower postpaid sales volumes.

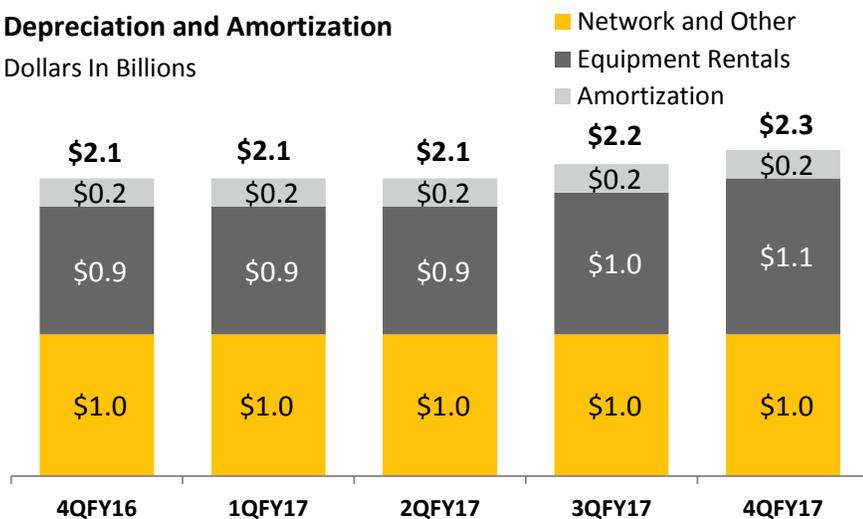

Cost of Equipment Sales

Dollars In Billions

Depreciation and Amortization

Dollars In Billions

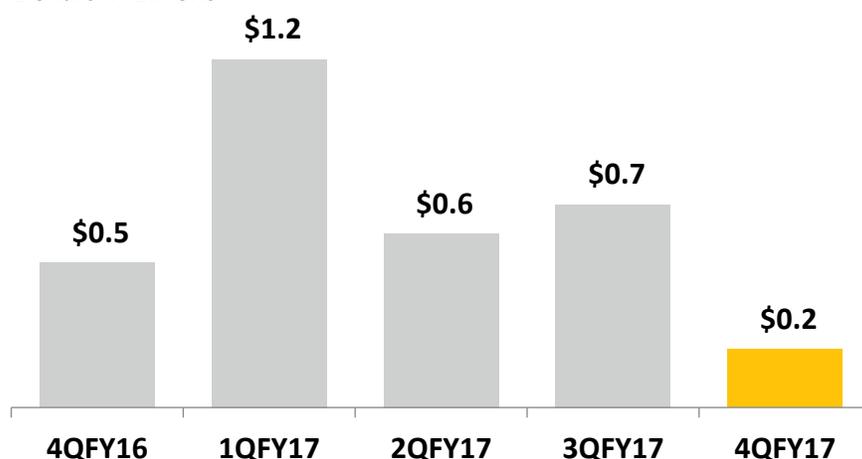

Depreciation and amortization expense

of \$2.3 billion for the quarter increased \$149 million year-over-year and \$86 million sequentially. Equipment rentals depreciation was \$1.1 billion in the quarter, \$911 million in the year-ago period, and \$990 million in the prior quarter.

Operating income of \$236 million compared to \$470 million in the year-ago period and \$727 million in the prior quarter. The current period included a \$189 million loss from asset dispositions, and \$77 million in severance, exit costs, and litigation settlements. The year-ago period included \$100 million primarily related to severance and exit costs, litigation and other contingencies, and contract terminations. The prior quarter included \$343 million in favorable settlements for patent infringement lawsuits net of legal fees, \$66 million of hurricane-related impacts, a \$51 million charge related to a regulatory fee matter, \$32 million litigation and other contingencies expense, and \$13 million in severance and exit costs. Adjusting for items in each period, operating income would have been relatively flat both year-over-year and sequentially.

Operating Income

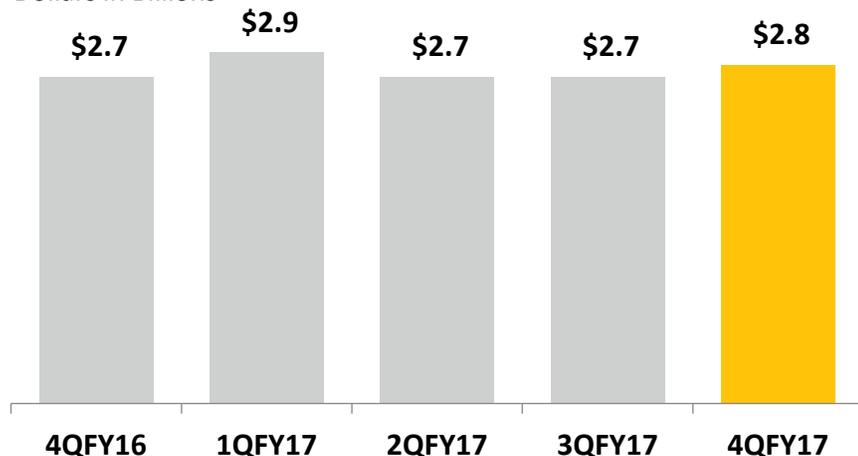

Dollars In Billions

Net income of \$69 million for the quarter compared to a net loss of \$283 million in the year-ago period and net income of \$7.2 billion in the prior quarter. The prior quarter included approximately \$7.1 billion of non-cash income tax benefit attributable to the re-measurement of the company's deferred tax assets and liabilities due to changes in tax laws.

Adjusted EBITDA*

Dollars In Billions

Adjusted EBITDA* was \$2.8 billion for the quarter, compared to \$2.7 billion in both the year-ago period and in the prior quarter. Both the year-over-year and sequential improvements were impacted by lower cost of equipment sales and cost of service expenses, partially offset by lower operating revenues. The sequential increase was also driven by lower selling, general and administrative expenses.

Net cash provided by (used in) operating activities[^]

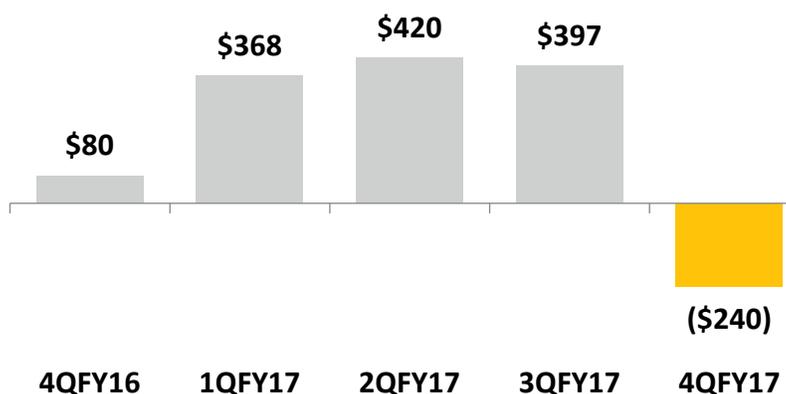

of \$2.7 billion for the quarter compared to negative \$523 million in the year-ago period and \$2.7 billion in the prior quarter. Year-over-year, the increase was primarily driven by a modification of our accounts receivable facility in February 2017, as well as favorable working capital changes.

Net Cash Provided by (Used In) Operating Activities [^]

Adjusted Free Cash Flow ^{*^}

Dollars In Millions

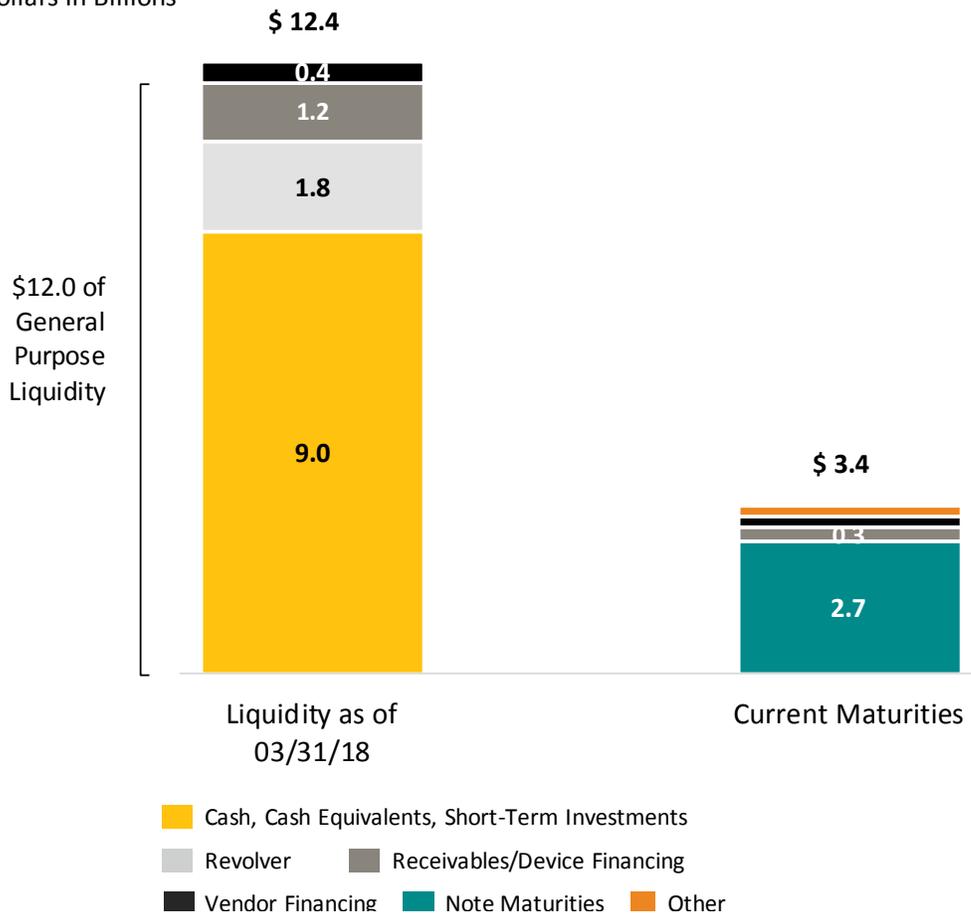

Adjusted free cash flow^{*^} of negative \$240 million for the quarter compared to positive \$80 million in the year-ago period and positive \$397 million in the prior quarter. Year-over-year, the decrease was driven by higher capital spending on leased devices and lower net proceeds of financings related to receivables, and was partially offset by higher cash flows from operations. Sequentially, the decrease was driven by lower net proceeds of financings related to receivables and partially offset by lower capital spending on leased devices.

Cash capital expenditures were \$2.7 billion in the quarter compared to \$1.6 billion in the year-ago period and \$3.2 billion in the prior quarter. The year-over-year increase was driven by higher spending on leased devices as well as higher capital expenditures for network equipment. Sequentially, the decrease was driven by seasonally lower spending on leased devices. Leased device capital expenditures now include purchases in both direct and indirect channels.

[^] The Company adopted ASU 2016-15, "Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments. Certain prior period amounts have been reclassified or restated in accordance with the new standard.

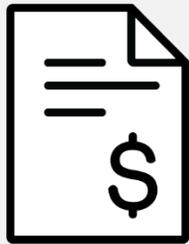

Liquidity and Debt

Dollars In Billions

Total general purpose liquidity was \$12.0 billion at the end of the quarter, including \$9.0 billion of cash, cash equivalents and short-term investments. Additionally, the company has approximately \$427 million of availability under vendor financing agreements that can be used toward the purchase of 2.5GHz network equipment.

^(a) During the three-month period ended March 31, 2018, a non-Sprint branded postpaid offering was introduced allowing prepaid customers to purchase a device under our installment billing program. As a result of the extension of credit, approximately 167,000 prepaid subscribers were migrated from the prepaid subscriber base into the postpaid subscriber base. In addition, net subscriber additions under the non-Sprint branded postpaid offering were 44,000 during the three-month period ended March 31, 2018.

^(b) Sprint is no longer reporting Lifeline subscribers due to regulatory changes resulting in tighter program restrictions. We have excluded them from our customer base for all periods presented, including our Assurance Wireless prepaid brand and subscribers through our wholesale MVNOS.

^(c) As part of the Shentel transaction, 186,000 and 92,000 subscribers were transferred from postpaid and prepaid, respectively, to affiliates, of which 18,000 prepaid subscribers were subsequently excluded from our customer base as a result of the Lifeline regulatory change as noted in (b) above. An additional 270,000 of nTelos' subscribers are now part of our affiliate relationship with Shentel and are being reported in wholesale and affiliate subscribers beginning with the quarter ended June 30, 2016. In addition, during the three-month period ended June 30, 2017, 17,000 and 4,000 subscribers were transferred from postpaid and prepaid, respectively, to affiliates and, during the three-month period ended March 31, 2018, 29,000 and 11,000 subscribers were transferred from postpaid and prepaid, respectively, to affiliates as a result of the transfer of additional subscribers to Shentel.

^(d) During the three-month period ended June 30, 2017, 2,000 Wi-Fi connections were adjusted from the postpaid subscriber base.

^(e) During the three-month period ended September 30, 2017, the Prepaid Data Share platform It's On was decommissioned as the Company continues to focus on higher value contribution offerings resulting in a 49,000 reduction to prepaid end of period subscribers.

^(f) During the three-month period ended December 31, 2016, the Company aligned all prepaid brands, excluding Assurance Wireless but including prepaid affiliate subscribers, under one churn and retention program. As a result of this change, end of period prepaid and affiliate subscribers as of December 31, 2016 were reduced by 1,234,000 and 21,000, respectively.

^(g) During the three-month period ended December 31, 2017, prepaid end of period subscribers increased by 169,000 in conjunction with the PRWireless HoldCo, LLC joint venture.

^(h) ARPU is calculated by dividing service revenue by the sum of the monthly average number of connections in the applicable service category. Changes in average monthly service revenue reflect connections for either the postpaid or prepaid service category who change rate plans, the level of voice and data usage, the amount of service credits which are offered to connections, plus the net effect of average monthly revenue generated by new connections and deactivating connections. Postpaid phone ARPU represents revenues related to our postpaid phone connections.

⁽ⁱ⁾ Postpaid ABPA* is calculated by dividing postpaid service revenue earned from postpaid customers plus billings from installment plans and non-operating leases, as well as equipment rentals, by the sum of the monthly average number of postpaid accounts during the period. Installment plan billings represent the substantial majority of the total billings in the table above for all periods presented.

^(j) Postpaid phone ABPU* is calculated by dividing service revenue earned from postpaid phone customers plus billings from installment plans and non-operating leases, as well as equipment rentals, by the sum of the monthly average number of postpaid phone connections during the period. Installment plan billings represent the substantial majority of the total billings in the table above for all periods presented.

NOTES TO THE FINANCIAL INFORMATION (Unaudited)

- (1) As more of our customers elect to lease a device rather than purchasing one under our subsidized program, there is a significant positive impact to EBITDA* and Adjusted EBITDA* from direct channel sales primarily due to the fact the cost of the device is not recorded as cost of equipment sales but rather is depreciated over the customer lease term. Under our device leasing program for the direct channel, devices are transferred from inventory to property and equipment and the cost of the leased device is recognized as depreciation expense over the customer lease term to an estimated residual value. The customer payments are recognized as revenue over the term of the lease. Under our subsidized program, the cash received from the customer for the device is recognized as revenue from equipment sales at the point of sale and the cost of the device is recognized as cost of equipment sales. During the three and twelve-month periods ended March 31, 2018, we leased devices through our Sprint direct channels totaling approximately \$1,213 million and \$4,884 million, respectively, which would have increased cost of equipment sales and reduced EBITDA* if they had been purchased under our subsidized program.

The impact to EBITDA* and Adjusted EBITDA* resulting from the sale of devices under our installment billing program is generally neutral except for the impact from the time value of money element related to the imputed interest on the installment receivable.

- (2) During the fourth and first quarters of fiscal year 2017, the company recorded losses on dispositions of assets primarily related to cell site construction and network development costs that are no longer relevant as a result of changes in the company's network plans. Additionally, the company recorded a pre-tax non-cash gain related to spectrum swaps with other carriers. During the third quarter of fiscal year 2016, the company recorded losses on dispositions of assets primarily related to cell site construction and network development costs that are no longer relevant as a result of changes in the company's network plans. During the second quarter of fiscal year 2016 the company recorded a pre-tax non-cash gain of \$354 million related to spectrum swaps with other carriers.
- (3) Severance and exit costs consist of lease exit costs primarily associated with tower and cell sites, access exit costs related to payments that will continue to be made under the company's backhaul access contracts for which the company will no longer be receiving any economic benefit, and severance costs associated with reduction in its work force.
- (4) During the first quarter of fiscal year 2017, we recorded a \$5 million gain due to reversal of a liability recorded in relation to the termination of our relationship with General Wireless Operations, Inc. (Radio Shack). During the fourth quarter of fiscal year 2016, we terminated our relationship with Radio Shack and incurred net contract termination charges of approximately \$27 million primarily related to cash termination payments and write-downs of leasehold improvements at associated retail stores that were shut down as of March 31, 2017. During the first quarter of fiscal year 2016, contract terminations primarily relate to the termination of our pre-existing wholesale arrangement with NTELOS Holding Corp.
- (5) During the fourth, third and first quarters of fiscal year 2017, litigation and other contingencies consist of reductions associated with legal settlements or favorable developments in pending legal proceedings as well as non-recurring charges of \$51 million related to a regulatory fee matter. During the fourth and second quarters of fiscal year 2016, litigation and other contingencies consist of unfavorable developments associated with legal matters as well as federal and state matters such as sales, use or property taxes.
- (6) During the fourth, third and second quarters of fiscal year 2017 we recorded estimated hurricane-related charges of \$7 million, \$66 million and \$34 million, respectively, consisting of customer service credits, incremental roaming costs, network repairs and replacements.
- (7) Sprint is no longer reporting Lifeline subscribers due to recent regulatory changes resulting in tighter program restrictions. We have excluded them from our customer base for all periods presented, including our Assurance Wireless prepaid brand and subscribers through our wholesale Lifeline mobile virtual network operators (MVNO). The table reflects the reclassification of the related Assurance Wireless prepaid revenue from Prepaid service revenue to Wholesale, affiliate and other revenue of \$85 million and \$360 million for the three and twelve-month periods ended March 31, 2017, respectively. Revenue associated with subscribers through our wholesale Lifeline MVNO's continue to remain in Wholesale, affiliate and other revenue following this change.

*FINANCIAL MEASURES

Sprint provides financial measures determined in accordance with GAAP and adjusted GAAP (non-GAAP). The non-GAAP financial measures reflect industry conventions, or standard measures of liquidity, profitability or performance commonly used by the investment community for comparability purposes. These measurements should be considered in addition to, but not as a substitute for, financial information prepared in accordance with GAAP. We have defined below each of the non-GAAP measures we use, but these measures may not be synonymous to similar measurement terms used by other companies.

Sprint provides reconciliations of these non-GAAP measures in its financial reporting. Because Sprint does not predict special items that might occur in the future, and our forecasts are developed at a level of detail different than that used to prepare GAAP-based financial measures, Sprint does not provide reconciliations to GAAP of its forward-looking financial measures.

The measures used in this release include the following:

EBITDA is operating income/(loss) before depreciation and amortization. **Adjusted EBITDA** is **EBITDA** excluding severance, exit costs, and other special items. **Adjusted EBITDA Margin** represents Adjusted EBITDA divided by non-equipment net operating revenues for Wireless and Adjusted EBITDA divided by net operating revenues for Wireline. We believe that Adjusted EBITDA and Adjusted EBITDA Margin provide useful information to investors because they are an indicator of the strength and performance of our ongoing business operations. While depreciation and amortization are considered operating costs under GAAP, these expenses primarily represent non-cash current period costs associated with the use of long-lived tangible and definite-lived intangible assets. Adjusted EBITDA and Adjusted EBITDA Margin are calculations commonly used as a basis for investors, analysts and credit rating agencies to evaluate and compare the periodic and future operating performance and value of companies within the telecommunications industry.

Postpaid ABPA is average billings per account and calculated by dividing postpaid service revenue earned from postpaid customers plus billings from installment plans and non-operating leases, as well as equipment rentals, by the sum of the monthly average number of postpaid accounts during the period. We believe that ABPA provides useful information to investors, analysts and our management to evaluate average postpaid customer billings per account as it approximates the expected cash collections, including billings from installment plans and non-operating leases, as well as equipment rentals, per postpaid account each month.

Postpaid Phone ABPU is average billings per postpaid phone user and calculated by dividing service revenue earned from postpaid phone customers plus billings from installment plans and non-operating leases, as well as equipment rentals by the sum of the monthly average number of postpaid phone connections during the period. We believe that ABPU provides useful information to investors, analysts and our management to evaluate average postpaid phone customer billings as it approximates the expected cash collections, including billings from installment plans and non-operating leases, as well as equipment rentals, per postpaid phone user each month.

Free Cash Flow is the cash provided by operating activities less the cash used in investing activities other than short-term investments and equity method investments. **Adjusted Free Cash Flow** is **Free Cash Flow** plus the proceeds from device financings and sales of receivables, net of repayments. We believe that Free Cash Flow and Adjusted Free Cash Flow provide useful information to investors, analysts and our management about the cash generated by our core operations and net proceeds obtained to fund certain leased devices, respectively, after interest and dividends, if any, and our ability to fund scheduled debt maturities and other financing activities, including discretionary refinancing and retirement of debt and purchase or sale of investments.

Net Debt is consolidated debt, including current maturities, less cash and cash equivalents and short-term investments. We believe that Net Debt provides useful information to investors, analysts and credit rating agencies about the capacity of the company to reduce the debt load and improve its capital structure.

SAFE HARBOR

This release includes “forward-looking statements” within the meaning of the securities laws. The words “may,” “could,” “should,” “estimate,” “project,” “forecast,” “intend,” “expect,” “anticipate,” “believe,” “target,” “plan”, “outlook,” “providing guidance,” and similar expressions are intended to identify information that is not historical in nature. All statements that address operating performance, events or developments that we expect or anticipate will occur in the future — including statements relating to our network, cost reductions, connections growth, and liquidity; and statements expressing general views about future operating results — are forward-looking statements. Forward-looking statements are estimates and projections reflecting management’s judgment based on currently available information and involve a number of risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements. With respect to these forward-looking statements, management has made assumptions regarding, among other things, the development and deployment of new technologies and services; efficiencies and cost savings of new technologies and services; customer and network usage; connection growth and retention; service, speed, coverage and quality; availability of devices; availability of various financings, including any leasing transactions; the timing of various events and the economic environment. Sprint believes these forward-looking statements are reasonable; however, you should not place undue reliance on forward-looking statements, which are based on current expectations and speak only as of the date when made. Sprint undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law. In addition, forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from our company’s historical experience and our present expectations or projections. Factors that might cause such differences include, but are not limited to, those discussed in Sprint Corporation’s Annual Report on Form 10-K for the fiscal year ended March 31, 2017, and, when filed, its Annual Report on Form 10-K for the fiscal year ended March 31, 2018. You should understand that it is not possible to predict or identify all such factors. Consequently, you should not consider any such list to be a complete set of all potential risks or uncertainties.

About Sprint:

Sprint (NYSE: S) is a communications services company that creates more and better ways to connect its customers to the things they care about most. Sprint served 54.6 million connections as of March 31, 2018 and is widely recognized for developing, engineering and deploying innovative technologies, including the first wireless 4G service from a national carrier in the United States; leading no-contract brands including Virgin Mobile USA, Boost Mobile, and Assurance Wireless; instant national and international push-to-talk capabilities; and a global Tier 1 Internet backbone. Today, Sprint’s legacy of innovation and service continues with an increased investment to dramatically improve coverage, reliability, and speed across its nationwide network and commitment to launching the first 5G mobile network in the U.S. You can learn more and visit Sprint at www.sprint.com or www.facebook.com/sprint and www.twitter.com/sprint.
